April 28, 2010

Debbie Britt, Executive Director
WV Rural Water Association
200 Young Street
Scott Depot, WV 25555

Dear Ms. Britt:

The City of Ripley Water Works would like to express its sincere gratitude to Circuit Rider Matt Lamp. Recently, Matt helped our utility in helping organize an on-site Chlorine Safety class with Mr. Mike Clark of Brenntag Mid-South Corporation. This on-site training was much needed and was professionally done. Matt's suggestions and recommendations made this an excellent training endeavor for our staff. Matt also recently helped our employees by training them to use a new computerized flow meter to record flows and pressure on every fire hydrant in our system. This flow meter was made available to us through an equipment loan with WVRWA. Matt is an excellent circuit rider and we feel fortunate to have him serving our area. Matt Lamp is an asset to the staff of WVRWA and to West Virginia's water systems.

Sincerely,

John Curry, Superintendent
City of Ripley Water Works
